

# ChatGPT

*Revolutionise your teaching with AI*

## What is ChatGPT?

- Advanced AI chatbot trained on vast internet data.
- Generates detailed, human-like responses.
- Aids in lesson planning and content creation.
- Always verify its suggestions for classroom use.
- For latest info, consider the paid version.

## Benefits of ChatGPT:

- Elevate teaching methods.
- Save time on lesson planning.
- Enhance student engagement.
- Improve teacher wellbeing.

## Mastering ChatGPT: The Art of Prompting

- Be clear and specific.
- Ask open-ended questions.
- Refine your prompts for best results.

## Sample Prompts:

1. "Differentiated strategies for [topic] in [subject]."
2. "Crafting assessment ideas for [topic] in [subject]."
3. "Engaging activities for [subject] lesson on [topic]."
4. "Draft a report card comment for [specific behavior/achievement]."
5. "Translate [text] into [language] for [subject] lesson."

## 10 Ways to Use ChatGPT:

1. Differentiated Instruction: Tailored lessons for individual student needs.
2. Assessment Planning: Craft ideas, exemplars, and rubrics.
3. Interactive Learning: Real-time student Q&A.
4. Lesson Planning: Generate plans and objectives.
5. Report Writing: Quick IEPs and report card comments.
6. Communication: Draft emails and newsletters.
7. Research Assistance: Gather resources and summaries.
8. Content Creation: Tailored texts and worksheets.
9. Language Translation: Aid in multilingual communication.
10. Feedback & Assessment: Instant feedback on student work.
